Rochester, NY 14624

Tour of Sydor Optics, Inc. Double-sided grinding and polishing of flat, parallel optics

Reservations required

Abstract Please join us for an Open House at Sydor Optics, Inc. The program will consist of a complete tour of the manufacturing and metrology areas followed by open time for discussion, networking and refreshments.

About Sydor Optics, Inc. Sydor Optics fabricates precision, flat-surfaced, parallel and wedged optics. We focus primarily on the manufacture of flat, parallel optics such as: colored glass filters, debris shields, glass wafers, lightpipes, mirrors, optical flats, plate beamsplitters, wedges, windows and witness samples.

Parking Please park in any available parking slot and enter from the front, east side of the building.

Reservations required To make a reservation please call or email Shawna Reitz at 585-271-7300 or shawna@sydor.com by Monday, Oct. 24.

Membership and membership renewal are encouraged. For details, please visit <http://www.osarochester.org/membershipform.html>.
